

Introducing the new Halcyon Mini-Explorer

The Halcyon Mini-Explorer represents a new generation of lighting, blending the performance and convenience of Halcyon exploration lighting with the size and portability of recreational, hand-held lights. Both recreational and technical divers will be impressed by the intense output of this convenient, pocket-sized light. The Mini-Explorer provides an amazing amount of light from a housing roughly the size of a modern-day smart phone, while offering run times up to 4.5 hours.*

Features

- Nearly indestructible LED module in Delrin® housing with amazing intensity and a tiny form-factor.
- Easily stored in your pocket or on your Halcyon harness.
- Ideal for travel due to light weight and long burn time.
- Innovative handle provides excellent portability with hands-free operation.
- Adjustable design can rapidly be customized to fit left or right hand, with or without gloves.
- Foldable handle protects LED and lens while in transport.
- May be fitted with an optional, fixed Goodman handle.
- Rear attachment point accommodates nearly any bolt snap or wrist lanyard.
- High-quality Delrin® housing is nearly indestructible.
- Removable battery carrier holds three Lithium Ultimate® single-use batteries with 4.5-hour runtime.*
- Battery carrier holds a wide range of AA batteries (rechargeable or disposable).
